INFORMASI TENTANG AKSI KORPORASI

Information on Corporate Actions

Pada 2022, Waskita berencana untuk melaksanakan aksi korporasi berupa Penambahan Modal Melalui Penawaran Umum Terbatas (PUT III) Dengan Hak Memesan Efek Terlebih Dahulu (HMETD). Diawali dengan meminta persetujuan melalui Rapat Umum Pemegang Saham Luar Biasa (RUPSLB) pada 26 September 2022. Persetujuan tersebut tertera pada Akta Risalah Rapat Umum Pemegang Saham Luar Biasa Perseroan Nomor 74 tanggal 26 September 2022 yang dibuat di hadapan Ashoya Ratam SH, M.Kn Notaris di Jakarta.

In 2022, Waskita planned to carry out corporate actions in the form of additional capital through a limited public offering (PUT III) with pre-emptive rights (HMETD). Starting with seeking approval through the Extraordinary General Meeting of Shareholders (EGMS) dated September 26, 2022, the approval was stated in the Deed of Minutes of Extraordinary General Meeting of Shareholders No. 74 dated September 26, 2022 made before Ashoya Ratam S.H., M.Kn Notary in Jakarta.

Selanjutnya, Waskita juga telah mendapatkan persetujuan dari Pemerintah Republik Indonesia dalam rangka penambahan modal melalui Peraturan Pemerintah Republik Indonesia Nomor 34 Tahun 2022 tentang Penambahan Penyertaan Modal Negara Republik Indonesia Ke Dalam Modal Saham Perusahaan Perseroan (Persero) PT Waskita Karya Tbk.

Furthermore, Waskita has also obtained approval from the Government of the Republic of Indonesia to increase capital through Government Regulation of the Republic of Indonesia No. 34 of 2022 on Addition of the Republic of Indonesia's State Equity Into the Share Capital of the Limited Liability Company (Persero) PT Waskita Karya Tbk.

Meski demikian, dikarenakan kondisi pasar global yang menantang dan kurang kondusif sehingga mempengaruhi kinerja harga saham Perseroan, berdasarkan rapat komite privatisasi yang dilaksanakan pada 27 Desember 2022 melalui surat Nomor T/EK/322/M.EKON/12/2022 tanggal 28 Desember 2022 perihal Keputusan Komite Privatisasi atas Perkembangan Rights Issue PT Waskita Karya (Persero) Tbk, maka aksi korporasi Penambahan Modal Melalui Penawaran Umum Terbatas (PUT III) Dengan Hak Memesan Efek Terlebih Dahulu (HMETD) ditunda pelaksanaannya. Penundaan ini dilakukan hingga kondisi harga saham dan kinerja Perseroan membaik.

However, due to challenging and unfavorable global market conditions that affected the performance of the Company's share price, based on the privatization committee meeting held on December 27, 2022 through letter No. T/EK/322/M.EKON/12/2022 dated December 28, 2022 on The decision of the Privatization Committee on PT Waskita Karya (Persero) Tbk's Rights Issue Development, the corporate action of increasing capital through a limited public offering (PUT III) with pre-emptive rights (HMETD) was postponed. This postponement was carried out until the condition of the Company's share price and performance improves.

Selain itu, Perseroan juga telah melakukan Keterbukaan Informasi atas penundaan aksi Korporasi tersebut melalui surat Perseroan Nomor 1916/WK/DIR/2022 tanggal 30 Desember 2022 perihal Keterbukaan Informasi atau Fakta Material terkait Penundaan Rencana Penambahan Modal Dengan Memberikan Hak Memesan Efek Terlebih Dahulu (HMETD) Melalui Mekanisme Penambahan Umum Terbatas III (PUT III).

In addition, the Company has also made Information Disclosure regarding the postponement of the corporate action through Company letter No. 1916/WK/DIR/2022 dated December 30, 2022 on Disclosure of Information or Material Facts related to Postponement of Plans to Increase Capital by Providing Preemptive Rights (HMETD) Through Limited General Addition Mechanism III (PUT III).

TINJAUAN PEREKONOMIAN DAN INDUSTRI

Economic and Industry Overview

Secara umum, situasi ekonomi dunia untuk tahun 2022 ditandai oleh tingkat pertumbuhan berdasarkan Produk Domestik Bruto (PDB) yang lebih rendah dibanding realisasi untuk tahun 2021. Mengacu pada *Global Economic Prospects* yang dirilis Bank Dunia pada Januari 2023, ekonomi dunia untuk tahun 2022 diestimasikan tumbuh sebesar 2,9%. Estimasi tersebut memperlihatkan tingkat pertumbuhan yang lebih rendah dibanding realisasi pertumbuhan di tahun 2022 yang sebesar 5,9%. Kelompok negara ekonomi maju diestimasikan tumbuh 2,9%, lebih rendah dibanding realisasi di tahun 2022 yang sebesar 5,3%, sedangkan kelompok negara ekonomi berkembang diestimasikan tumbuh 3,4%, atau lebih rendah dibanding realisasi di tahun 2022 yang sebesar 6,7%.

General conditions of the 2022 world economy growth rate can be seen based on the Gross Domestic Product (GDP) which is lower than the realization in 2021. Referring to the *Global Economic Prospects* released by the World Bank in January 2023, the world economy for 2022 is estimated to grow by 2.9%, a lower growth rate compared to actual growth in 2022 of 5.9%. Advanced economies are estimated to grow at 2.9%, lower than the realization in 2022 of 5.3%, while developing economies are estimated to grow 3.4%, or lower than the realization in 2022 of 6.7 %.

Selama tahun 2022, Board of Commissioners melaporkan, Board of Directors beserta jajaran terkait telah melaksanakan implementasi sejumlah strategi sesuai pencapaian target yang telah ditetapkan, baik di dalam RKAP maupun RJPP, seiring penerapan transformasi bisnis dalam keseluruhan program 8 stream penyehatan keuangan.

Terdapat sejumlah hal yang berpengaruh terhadap situasi pertumbuhan ekonomi tersebut, antara lain penurunan tingkat perdagangan dunia serta peningkatan harga sejumlah komoditas dibanding tahun 2021. Merujuk pada laporan yang sama, tingkat perdagangan dunia diestimasikan tumbuh sebesar 4,0%, atau lebih rendah dibanding realisasi di tahun 2021 yang sebesar 10,6%. Indeks harga energi diestimasikan berada pada level 151,7%, lebih tinggi dibanding level di tahun 2021 yang sebesar 95,4%. Sementara itu, indeks harga komoditas non-energi dunia untuk tahun 2022 berada pada level 123,7%, atau lebih tinggi dibanding level di tahun 2021 yang sebesar 112,0%.

Such economic growth is influenced by a number of matters, such as the declining world trade and increasing prices of a number of commodities compared to 2021. Referring to the same report, the level of world trade is estimated to grow by 4.0%, or lower than the realization in 2021 of 10.6%. The energy price index is estimated at 151.7%, higher than the 2021 level of 95.4%. Meanwhile, the world non-energy commodity price index for 2022 was at the level of 123.7%, or higher than the level in 2021 of 112.0%.

Di tengah situasi tersebut, ekonomi Indonesia tercatat mampu merealisasikan pertumbuhan yang kuat, seiring kebijakan fiskal dan moneter yang kuat serta tingkat daya beli masyarakat yang terjaga. Sesuai laporan Badan Pusat Statistik (BPS) yang dirilis Februari 2023, ekonomi Indonesia tahun 2022 tercatat tumbuh mencapai 5,31% atau lebih tinggi dibanding pertumbuhan di tahun 2021 yang sebesar 3,70%. Sebagai faktor yang berpengaruh terhadap situasi tersebut, sejumlah kebijakan fiskal dan moneter yang telah dikeluarkan untuk mendukung kondisi ekonomi di tahun 2022 mencakup penyaluran perlindungan sosial, peningkatan realisasi subsidi energi, hingga peningkatan BI 7-Day Repo Rate.

Amidst this situation, the Indonesian economy was capable of realizing strong growth in line with strong fiscal and monetary policies and maintaining levels of people purchasing power. According to the Statistics Indonesia (BPS) report in February 2023, Indonesia's economy in 2022 grew by 5.31% or higher than growth in 2021 of 3.70%. This figure was influenced by a number of fiscal and monetary policies issued to support economic conditions in 2022, including the provision of social security, increase in the realization of energy subsidies, and increase in the BI 7-Day Repo Rate.

During 2022, the Board of Commissioners reports that the Board of Directors and the related staff have implemented a number of strategies in accordance with the achievement of targets set, in the RKAP and RJPP, in line with the implementation of business transformation of all 8 streams of financial restructuring programs.

Mengacu pada data yang dirilis BPS, industri konstruksi Indonesia untuk tahun 2022 diketahui mengalami pertumbuhan yang lebih rendah dibanding pada tahun 2021. Hal tersebut antara lain terlihat melalui pertumbuhan kontribusi terhadap PDB, dengan persentase 2,01% atau lebih rendah dibanding pada tahun 2021 yang sebesar 2,81%. Di samping itu, situasi industri yang ketat juga terlihat dari jumlah perusahaan konstruksi yang menurun 3,13%, dari sejumlah 203.403 menjadi 197.030 pada tahun 2022. Faktor-faktor yang memberi pengaruh terhadap situasi tersebut mencakup belum beroperasinya sejumlah proyek secara optimal hingga dampak situasi ekonomi dunia setelah konflik Rusia dan Ukraina.

Referring to BPS data, Indonesia's construction industry for 2022 experienced lower growth than 2021. This can be seen, among others, through the growth in contribution to GDP, with a percentage of 2.01% or lower than in 2021 of 2.81%. In addition, the tight industrial situation can also be seen through the number of construction companies which decreased by 3.13%, from 203,403 to 197,030 in 2022. Factors influencing this situation include the non-optimum operation of a number of projects and the impact of the world economic after the Russo-Ukrainian conflict.

Meski demikian, ditengah situasi industri tersebut, Pemerintah Indonesia secara konsisten menyalurkan dukungan bagi kelanjutan sejumlah proyek infrastruktur di Indonesia. Hal tersebut antara lain tercermin melalui alokasi anggaran infrastruktur yang tetap besar, yaitu mencapai Rp373,1 triliun, dengan realisasi Penyertaan Modal Negara (PMN) mencapai Rp38.479 miliar. Selain itu, selama tahun 2022, Pemerintah Indonesia juga telah merealisasikan pembiayaan proyek infrastruktur melalui Surat Berharga Syariah Negara (SBSB) pada 12 (dua belas) K/L dengan nilai pembiayaan Rp2954 triliun pada sejumlah 880 proyek infrastruktur, mencakup jalan dan jembatan, infrastruktur SDM, hingga transportasi.

However, amidst the industrial situation, the Government of Indonesia has consistently provided support for the continuation of a number of infrastructure projects in Indonesia. This is reflected, among others, through the allocation of the infrastructure budget which remains large, at Rp373.1 trillion, with the realization of State Equity Participation (PMN) of Rp38,479 billion. In addition, during 2022, the Government of Indonesia has also realized infrastructure project financing through Sharia Government Securities (SBSB) for 12 (twelve) Ministries/Institutions with a financing value of Rp2954 trillion in a total of 880 infrastructure projects, including roads and bridges, HC infrastructure, and transportation.

PANDANGAN ATAS PROSPEK USAHA YANG DISUSUN BOARD OF DIRECTORS

Views on Business Outlook Prepared by the Board of Directors

Selama tahun 2022, pelaksanaan fungsi pengawasan dan pemberian nasihat yang dilaksanakan *Board of Commissioners* juga telah mencakup penelaahan terhadap prospek usaha yang disusun oleh *Board of Directors*, yang tercermin melalui penetapan sejumlah target di dalam RKAP 2023. Penelaahan terhadap prospek usaha tersebut merupakan dasar bagi *Board of Commissioners* dalam melakukan penilaian terhadap kecukupan sumber daya perusahaan dan kesiapan internal dalam menghadapi proyeksi situasi ekonomi di tahun 2023.

Atas penelaahan yang dilakukan, *Board of Commissioners* memandang, prospek usaha yang disusun *Board of Directors* telah mempertimbangkan indikator ekonomi serta asumsi atas sejumlah faktor yang memiliki kemungkinan untuk berpengaruh terhadap sektor industri Waskita. Pembahasan mengenai sejumlah indikator dan asumsi yang digunakan dalam penyusunan prospek usaha oleh *Board of Directors* adalah sebagai berikut.

Secara umum, perekonomian dunia untuk tahun 2023 diperkirakan akan berada pada situasi yang cukup ketat. Mengacu pada data yang dirilis Bank Dunia pada Januari 2023, ekonomi dunia diproyeksi tumbuh sebesar 1,7%, lebih rendah dibanding estimasi pertumbuhan di tahun 2022 yang sebesar 2,9%. Kelompok negara ekonomi maju diproyeksi akan tumbuh 0,5%, lebih rendah dibanding estimasi pertumbuhan tahun 2022 yang 2,5%, sedangkan kelompok negara ekonomi berkembang diproyeksi tumbuh 3,4% atau sama dengan estimasi pertumbuhan di tahun 2022 yang sebesar 3,4%. Situasi serupa juga terlihat pada proyeksi pertumbuhan volume perdagangan dunia, yang lebih rendah 2,4%, serta indeks harga komoditas energi yang lebih rendah 21,2 poin dari estimasi untuk tahun 2022.

Di tengah proyeksi pelemahan pertumbuhan ekonomi dunia, ekonomi Indonesia diperkirakan tetap akan mampu tumbuh secara kuat di tahun 2023. Hal tersebut antara lain terlihat melalui laporan Bank Dunia dengan pertumbuhan ekonomi Indonesia diproyeksikan mampu terealisasi sebesar 4,8%, atau di atas proyeksi pertumbuhan kumulatif negara-negara ekonomi berkembang yang sebesar 3,4%. Bank Indonesia melalui informasi yang dirilis pada Februari 2023 juga memperkirakan ekonomi Indonesia mampu tumbuh secara kuat, pada kisaran 4,5-5,3%.

During 2022, the implementation of the supervisory and advisory functions by the Board of Commissioners also covered a review of the business outlook prepared by the Board of Directors, which is reflected in the setting of a number of targets in the 2023 RKAP. The review of the business outlook serves as the basis for the Board of Commissioners in evaluating the adequacy of Company resources and internal readiness in facing the projected economic situation for 2023.

Based on the review, the Board of Commissioners views that the business outlook prepared by the Board of Directors have taken into account economic indicators and assumptions for a number of factors that may impact Waskita's industry. Discussion of a number of indicators and assumptions used in preparing business outlook by the Board of Directors is as follows.

In general, the world economy for 2023 is estimated to be in a fairly tight situation. Referring to data released by the World Bank in January 2023, the world economy is projected to grow by 1.7%, lower than the estimated 2022 growth of 2.9%. The developed economies are projected to grow 0.5%, lower than the estimated growth in 2022 of 2.5%, while emerging economies are projected to grow 3.4% or similar to the estimated growth in 2022 of 3.4%. A similar situation can also be seen in the projected growth in world trade volume which is 2.4% lower, as well as the energy commodity price index which is 21.2 points lower than the estimate for 2022.

In the midst of projected slowdown in world economic growth, Indonesia's economy is expected to continue to grow strongly in 2023. This can be seen, among others, in the World Bank report stating Indonesia's economic growth is projected at 4.8%, or above the country's projected cumulative growth of emerging economies which amounted to 3.4%. Bank Indonesia in February 2023 also estimated that the Indonesian economy will be able to grow strongly, in the range of 4.5-5.3%.

Sejumlah hal yang diperkirakan memberi pengaruh terhadap tingkat pertumbuhan ekonomi Indonesia antara lain peningkatan permintaan domestik, meliputi konsumsi rumah tangga, berlanjutnya penyelesaian Proyek Strategis Nasional (PSN), serta meningkatnya Penanaman Modal Asing (PMA) seiring peningkatan mobilitas masyarakat setelah penghapusan Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM).

Industri konstruksi di Indonesia untuk tahun 2023 diperkirakan mampu tetap berada pada situasi yang kondusif, seiring kelanjutan dukungan Pemerintah Indonesia terhadap pembangunan infrastruktur. Mengacu pada Informasi APBN 2023 yang dirilis Kementerian Keuangan, pembangunan infrastruktur masih menjadi salah satu fokus strategi Pemerintah Indonesia dalam meningkatkan produktivitas dan menguatkan reformasi struktural di tahun 2023. Atas hal tersebut, ABPN 2023 di antaranya diarahkan untuk menghadirkan dukungan fiskal, yang terlihat melalui kebijakan belanja Pemerintah Pusat serta Kementerian/Lembaga di tahun 2023.

Dengan mempertimbangkan uraian di atas, *Board of Commissioners* menilai, Waskita memiliki prospek usaha yang baik untuk tahun 2023. Terdapat peluang bagi Waskita untuk dapat berkontribusi secara optimal seiring dukungan yang kuat dari Pemerintah dan proyeksi situasi ekonomi Indonesia di tahun 2023 yang kondusif. *Board of Commissioners* memastikan bahwa *Board of Directors* beserta jajaran terkait telah mempersiapkan sumber daya dan kesiapan Waskita untuk mendukung pembangunan infrastruktur dalam keseluruhan upaya jangka panjang Pemerintah dalam mengurangi tingkat disparitas ekonomi di sejumlah wilayah Indonesia.

Terkait hal tersebut, *Board of Commissioners* telah menyampaikan saran dan rekomendasi terkait strategi dan kebijakan strategis yang akan dilaksanakan *Board of Directors* untuk tahun 2023, antara lain:

1. Peningkatan efisiensi biaya dan efektivitas pengelolaan kas agar arus kas operasi terus mengalami perbaikan.
2. Percepatan penagihan piutang proyek, melakukan inovasi-inovasi marketing untuk meningkatkan NKM, serta memprioritaskan proyek jangka pendek.
3. *Board of Commissioners* meminta *Board of Directors* untuk berfokus pada proyek yang mengalami cost dan/atau time overrun dan melakukan langkah mitigasi yang diperlukan.

Indonesia's economic growth rate was based on a number assumptions, namely the increase in domestic demand, such as household consumption, continued completion of the National Strategic Project (PSN), and increase in Foreign Investment (PMA) in line with the increase in people's mobility after the abolition of Public Mobility Restriction (PPKM).

The construction industry in Indonesia for 2023 is expected to remain conducive in line with the continued support from the Government of Indonesia for infrastructure development. Referring to the 2023 State Budget by the Ministry of Finance, infrastructure development is still one of the focuses of the Government of Indonesia's strategy in increasing productivity and strengthening structural reforms in 2023. Therefore, the 2023 State Budget is directed, among others, to provide fiscal support, which can be seen through spending policies Central Government and Ministries/Agencies in 2023.

For such projections, the Board of Commissioners considers that Waskita has good business prospects for 2023. Waskita has the opportunity to be able to contribute optimally along with strong support from the Government and the projection of a conducive Indonesian economy in 2023. The Board of Commissioners ensures that the Board of Directors and related staff have prepared Waskita's resources and readiness to support infrastructure development in the overall long-term efforts of the Government in reducing the level of economic disparity in a number of regions of Indonesia.

In this regard, the Board of Commissioners has submitted suggestions and recommendations regarding the strategies and strategic policies to be implemented by the Board of Directors for 2023, including:

1. Increasing cost efficiency and effectiveness of cash management so that operating cash flow continues to improve.
2. Accelerating the collection of project receivables, implementing marketing innovations to increase NKM, and prioritizing short-term projects.
3. The Board of Commissioners requests the Board of Directors to focus on projects that experience cost and/or time overruns and take the necessary mitigation steps.

Waskita didirikan atas langkah Pemerintah Indonesia dalam melakukan nasionalisasi terhadap perusahaan-perusahaan asing di bidang usaha strategis, salah satunya perusahaan konstruksi milik Belanda yaitu “Volker Aannemings Maatschappij N.V.”. Proses nasionalisasi terhadap perusahaan tersebut dilakukan berdasarkan Keputusan Pemerintah No. 62/1961.

Memasuki dasawarsa 1980-an, Waskita mulai mengerjakan sejumlah proyek dengan penggunaan teknologi maju, melalui aliansi bisnis berupa *joint operation* dan *joint venture* dengan perusahaan-perusahaan asing terkemuka. Di antara prestasi monumental yang berhasil dilaksanakan Waskita pada fase ini adalah Bandara Soekarno-Hatta, Cengkareng. Pada 1990-an, Waskita

The nationalization process was carried out based on Government Decree No. 62/1961.

Entering the 1980s, Waskita began to embark on various projects, including projects that involve advanced technology through business alliances such as joint operation and joint venture with leading foreign companies. Hal tersebut berperan penting dalam memudahkan keperluan pemasaran serta pengecekan data di dalam sistem, baik terkait proyek maupun pelanggan.

This plays an important role in facilitating marketing needs and checking data in the system, both related to projects and customers.

Waskita has developed its market segment towards the overseas market segment by opening branch offices in Dubai, Abu Dhabi and Jeddah, as well as acquiring and implementing a number of high-rise development projects in these cities.
